### Helping Clients Recover from Trauma

- **What is trauma and how can it affect a client?**
  - Disturbing life events that have lasting effects
  - Abuse, neglect, divorce, illness, loss, bullying, ridicule, intense fear, being accused of a crime
  - These events overwhelm clients' ability to cope and can lead to ongoing distress including physical/emotional pain, fear, panic, anxiety, anger, grief, shame, and feelings of helplessness
- **What is EMDR?**
  - EMDR is an integrative psychotherapy approach that has been extensively researched
  - EMDR interventions seek to alleviate these symptoms by unblocking the brain's natural healing processes allowing clients to move toward adaptive beliefs conducive to emotional wellbeing
  - EMDR protocol includes an eight phase model that integrates past, present, and future triggers to eliminate intrusive thoughts, negative emotions, as well as negative beliefs about oneself
- **What are our results?**
  - Healing from trauma and emotional pain
  - Reduction of depression and anxiety with restoration of positive future outlook
  - Insights that turn around negative beliefs and enhance a sense of personal power and self-worth

### Professional Profile
